Dear Mr. [REDACTED]

Reference your letter with photographs, to the Air Technical Intelligence Center, now the Foreign Technology Division at Dayton, Ohio.

You numbered the figures on the photographs and identified them as #1, the UFO; #2, dirt and #3, scratches. The Air Force concludes that #1 is a lens flare, light resulting from inter-reflection between lens surfaces; #2, water spots on the negative; and #3, scratches.

Your photographs are attached.

Sincerely,

On July 15 of this year I was taking test exposures for the eclipse that will occur on July 20. I was using a 3 inch telescope with a 1½ inch finder. I attached a 35mm camera to the finder without using the camera's lens. I tried about ten different exposures. The time was about 5:45 PM. The same day I developed the film at normal time. After drying I printed the pictures, now I am very curious what figure No. 1 is. Please notify as quickly as possible what it may be.

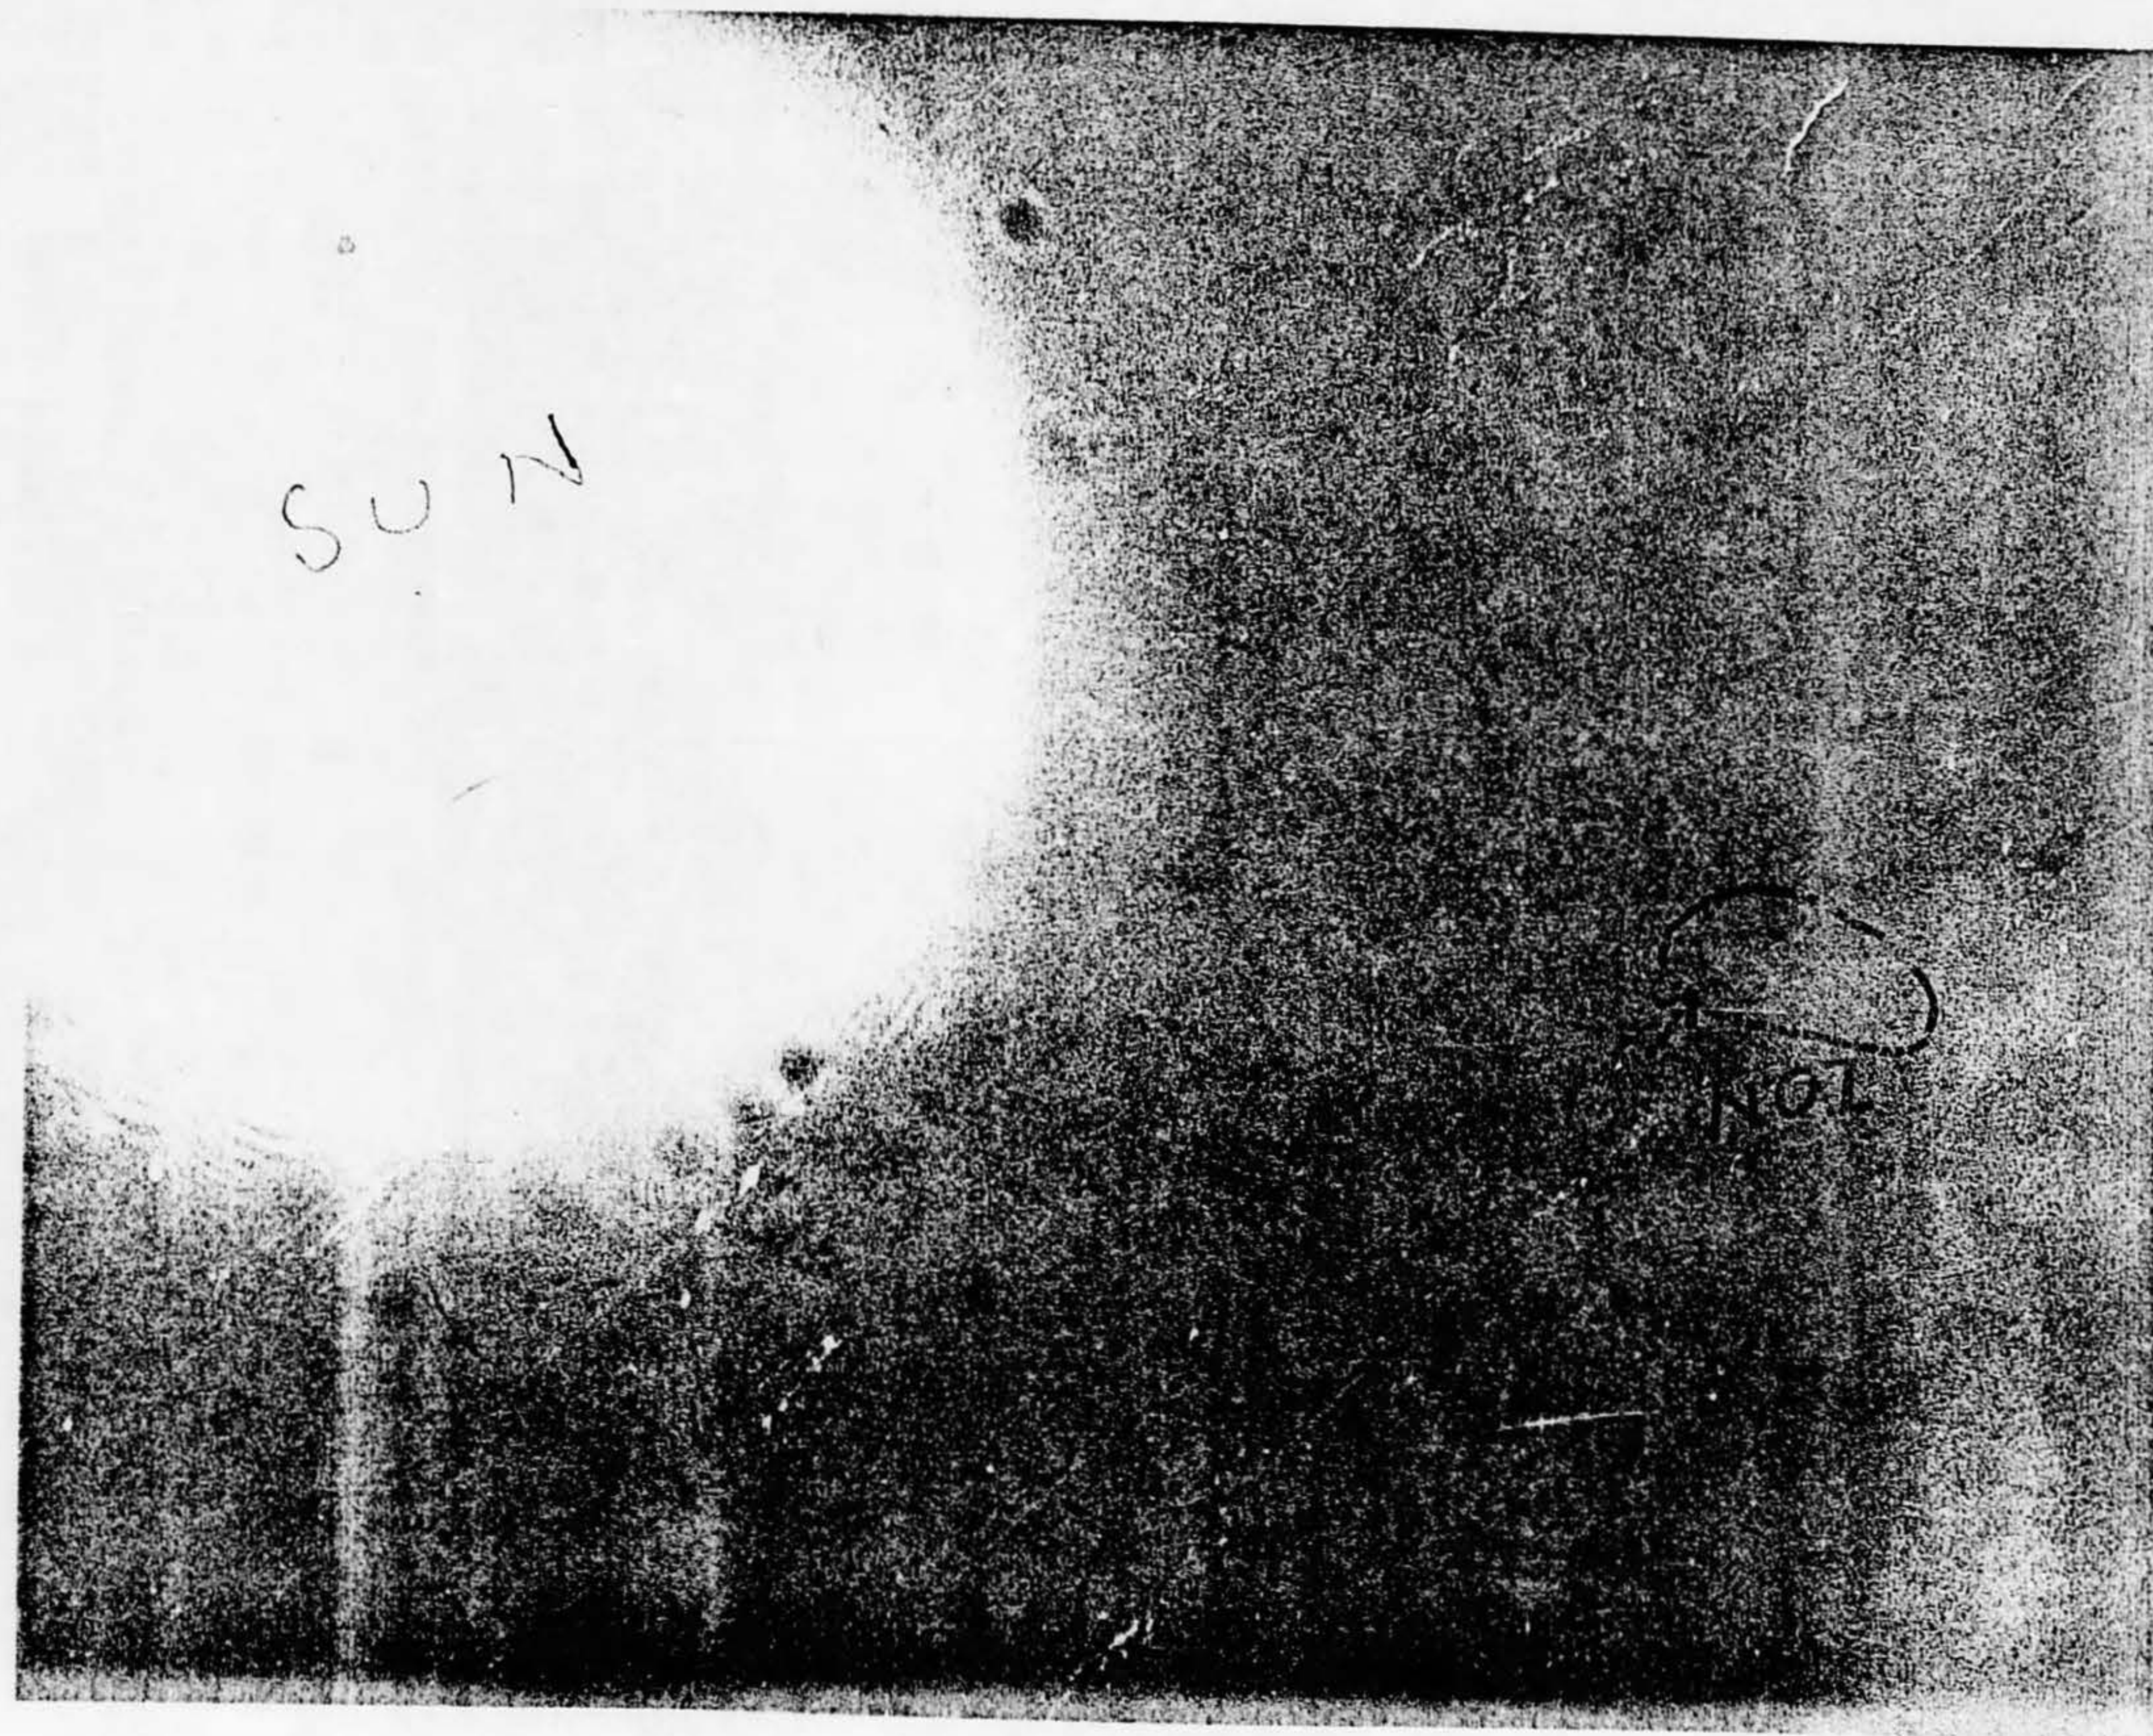

Very truly yours
